Геронтология

Практическое Руководство

Введение

Реферативно-библиографическая база данных PsycINFO, публикуемая Американской Психологической Ассоциацией, является богатейшим источником информации, которым широко пользуются исследователи, профессура, персонал учебных заведений, студенты, и профессионалы самых различных дисциплин.

Геронтологи открыли для себя неопределимые возможности PsycINFO для исследования социальных, психологических и биологических аспектов старения человека. Многие другие профессионалы, включая научных сотрудников, социальных работников, специалистов в области медицины, и администраторов учреждений здравоохранения, также используют PsycINFO для поиска информации по различным вопросам и проблемам, связанным со старением и с людьми пожилого возраста.

Освещение Темы Геронтологии в PsycINFO

Приведем лишь несколько примеров из многочисленных областей исследования, охваченных в PsycINFO и имеющих отношение к геронтологии:

Пример 1. Пользование Интернетом среди Пожилых Людей.

Для геронтолога может представлять интерес, как пожилые люди используют Интернет. Результаты поиска в PsycINFO при запросе с использованием ключевых терминов **Internet AND Aging** включают следующие публикации:

Dunning, T. (2007). **Aging, activities and the Internet: Senior adult friendly search engines.** *Activities, Adaptation & Aging*, 31, 61-62.

Hardt, J. H., & Hollis-Sawyer, L. (2007). **Older adults seeking healthcare information on the internet.** *Educational Gerontology*, 33, 561-572.

Turner, P., Turner, S., & Van de Walle, G. (2007). **How older people account for their experiences with interactive technology.** *Behaviour & Information Technology*, 26, 287-296.

Yardley, L., & Nyman, S. R. (2007). **Internet provision of tailored advice on falls prevention activities for older people: A randomized controlled evaluation.** *Health Promotion International*, 22, 122-128.

Пример 2. Влияние Социальных Сетей на Людей Пожилого возраста.

Социальный работник хочет найти исследования, подтверждающие значимость социальных связей и сетей поддержки в жизни людей пожилого возраста. Чтобы получить релевантные результаты поиска в PsycINFO, используйте ключевые слова **Aging** и **Social Networks** или **Social Support**.

Gow, A. J., Pattie, A., Whiteman, M. C., Whalley, L. J., & Deary, I. J. (2007). **Social support and successful aging: Investigating the relationships between lifetime cognitive change and life satisfaction.** *Journal of Individual Differences*, 28, 103-115.

Lee, E. O., & Sharpe, T. (2007). **Understanding religious/spiritual coping and support resources among African American older adults: A mixed-method approach.** *Journal of Religion, Spirituality & Aging*, 19, 55-75.

Litwin, H. (2007). **The interpersonal milieu of older people.** In S. Carmel, C. Morse, & F. Torres-Gil (Eds.), *Lessons on aging from three nations, Volume I: The art of aging well.* (pp. 169-184). Amityville, NY: Baywood.

Abstract

A total of 32 interviews were conducted with women in academia who were born between 1946 and 1964. Twenty-one of these interviews were completed with academic women in the United States and eleven with academic women in New Zealand. The data were analyzed to determine what these "baby boomers" anticipate for their retirement as well as their concerns about facing retirement. Cohort and cross-cultural comparisons were made. The authors

identified common themes in the interviews. These included rejection of the traditional definition of retirement, anticipated age at retirement determined by personal needs rather than age-graded societal norms, retirement projected to be an active period involving a mix of work and leisure activities, and major concerns, about health and health care, the availability of entitlements and finances. The findings from this study indicate baby boomers are forging a new path for retirement. Further research investigating the transition for women of the baby boom generation from worker to retiree may open windows into the future of retirement for women.
