CURA DEI PAZIENTI

Applicazioni interdisciplinari

INTRODUZIONE

Il database bibliografico PsycINFO, creato dall'American Psychological Association, è uno strumento indispensabile per gli psicologi, i ricercatori e gli studenti. Il database è inoltre una fonte inesauribile di materiale interdisciplinare, con oltre 2 milioni di documenti selezionati da quasi 2.000 pubblicazioni provenienti da tutto il mondo. Gli infermieri, gli operatori sanitari e i ricercatori clinici hanno scoperto il valore di PsycINFO per le loro ricerche in una vasta gamma di argomenti attinenti alla sanità, dagli aspetti comportamentali nella cura dei pazienti alla promozione della salute, dalla prevenzione del disagio all'educazione del paziente. Le problematiche relative alla cura dei pazienti sono inoltre presenti nelle sezioni relative agli studi clinici, all'educazione, ai professionisti e alla ricerca..
