

# Public Health PsycEXTRA®

AMERICAN  
PSYCHOLOGICAL  
ASSOCIATION

## Interdisciplinary Applications

### Introduction

Up-to-date information in the area of public health helps professionals monitor and evaluate the health needs of communities, identify and eliminate environmental hazards to ensure that populations remain healthy, and promote healthy practices and behaviors.

One of the newest databases from the American Psychological Association, PsycEXTRA is a rich resource for locating hard-to-find information on a variety of public health topics. With more than 60,000 bibliographic records and almost 200,000 pages of full-text material in the behavioral sciences — such as technical and research reports, policies and standards, curricula, conference papers, and newsletters of professional organizations — PsycEXTRA has valuable content for both public health professionals and consumers.

### Sample Search Terms
